

LogiFlow — Bug Report

Weeks 1–7 | NextGen Forge Technologies Internship | Ref: NFGT/HR/INT/2026/160

Candidate: Aryan Ajmera Industry Guide: Aryan Sharma Report Date: August 22, 2026

Project: LogiFlow — Enterprise Logistics & Warehouse Management Platform

Week	Module	Description	Severity	Status
W3	Customer API	Server crashed on every Customer endpoint except create — model was imported under the wrong name.	Critical	Resolved
W3	Shipment API	Server crashed on the shipment status-update route due to an import/export name mismatch.	Critical	Resolved
W7	Customer API	Customer list endpoint returned a 500 on every request due to an undeclared variable reference.	Critical	Resolved
W7	Dashboard	Warehouse Executive got a blank white page on login from an unguarded null value on a restricted endpoint.	Critical	Resolved
W3	Order API	Order creation returned multiple responses / crashed for multi-item orders due to async loop misuse.	High	Resolved
W3	Order / Shipment	An already-Delivered order could be cancelled; an already-Delivered shipment could be marked Failed.	High	Resolved
W5	Auth / Session	Frontend could not reach backend at all due to missing CORS configuration and a port mismatch.	High	Resolved
W5	Auth / Session	Logged-in users were bounced back to the login page on a full page refresh (race condition).	High	Resolved
W5	Dashboard	Dashboard hung indefinitely on "Loading..." for roles without access to certain restricted endpoints.	High	Resolved
W6	Frontend Infra	Intermittent blank-page crash across the app from a React Fast Refresh export violation.	High	Resolved
W7	Driver / Vehicle	A driver's assigned vehicle could disagree with the vehicle they were actually dispatched with.	High	Resolved
W7	Dispatch API	Completing a dispatch freed the vehicle/driver but did not mark the linked Order as Delivered.	High	Resolved
W7	Shipment UI	Manually marking a shipment Delivered bypassed dispatch completion, leaving vehicle/driver stuck unavailable.	High	Resolved
W7	Inventory	Low-stock filter always returned empty despite visibly low-stock items, since order flows never set the alert flag.	High	Resolved
W7	Top Navigation	User avatar was not clickable; no logout option existed anywhere in the app.	High	Resolved
W7	Sidebar	Customer Support Executive role saw only the Dashboard link, with no access to Tickets.	High	Resolved
